Simon Weiss
Front End Developer

—

About me

I am a Front-End Developer with experience in building web apps with JavaScript & Angular. You can find my projects that include responsive websites and games in my public porftolio. I started coding with some fun websites for myself. It turned out that the structured approach to problem solving is something I am good at and I enjoy. So I decided to learn professional coding at a software development school in Germany. Now I am looking forward to building on my experience in a junior developer position.

Main Stack:

- JavaScript
- TypeScript, Angular
- HTML, CSS, Bootstrap

Side Stack:

- Git, APIs (REST), Google Firebase, Scrum

—

Skills

- **Building Applications with JavaScript & Angular:** I built landing-pages and several web apps as well as OOP-based Jump-and-Run-Games with the respective technologies.
- **Working in a Software-Team:** I did several group projects where I learned how to develop a software project in a team using Github.
- **High sense of responsibility:** I am used to take responsibility of my work. I always handle things like they belong to myself, so I can push the best possible result out of me.
- **Doing the hard work:** Beside family and working full time in my current job, I improve my professional coding skills every evening until night.
- **Learning new things:** I like challenges and improvements of my person in all fields, also if it gets hard or if it's no fun.

Professional Experience

Novafon GmbH / Junior Software Developer
NOV 2022 - PRESENT, Weinstadt

- Developing new features / plugins in Shopware
- Bug fixing / Problem solving
- Responsive emails

Vhf Camfacture AG / Industrial Mechanic
JAN 2018 - OCT 2022, Ammerbuch

- Developing a hightech CNC machine in a team
- Daily feedback exchange with the Technical Supervisor
